Subject: FW: R8 5% holdback Pipeline needs -- Potential template for additional RA funds at the Standard Mine site.
Attachments: The Anaconda Aluminum Co Columbia Falls Reduction Plant.docx; Colorado Smelter Additional Pipeline Funding Request.docx

Hi Jim,

This template was for a different purpose (i.e., replace pipeline with RA)... perhaps it will serve as a good example for your write up.

In this regard, please provide the following information for each project requiring additional funding:

1. Amount Requested for FY 2016
2. Site Name/OU/Action
3. How will funds be used?
4. When will the funds be obligated/expended?
5. Why this project cannot be funded within the region's FY 2016 Pipeline base allocation?
6. Are Special Account funds available to fund this project?
7. What is the benefit of the work to the Remedial Program (e.g., schedule acceleration)?
8. What is the impact of not funding the work (e.g., shelving a project)?
9. Will this create an additional FY 2017 funding need?

Art,

Attached are the write ups for Columbia Falls Aluminum and Colorado Smelter to request additional Pipeline AOA funds for FY16. Both of these needs are very high priority for us and any additional funding will be greatly appreciated. Please let me know if you need clarification or more info on either.

Thanks!
